Attachment 3

Proposed Amendments to Parts 2 and 15 of the Rules Satellite Industry Association
May ___, 2002

Proposed Changes to Part 15 Rules:

- §15.3 Definitions
- (ee) Radar detector. Any device containing a radio receiver that detects the presence of radar signals.

§15.101 Equipment authorization of unintentional radiators.

(a) Except as otherwise exempted in §15.23, 15.103, and 15.113, unintentional radiators shall be authorized prior to the initiation of marketing, as follows:

Type of device Equipment authorization required

TV broadcast receiver Verification FM broadcast receiver Verification

CB receiver Declaration of Conformity or Certification
Superregenerative receiver Declaration of Conformity or Certification

Scanning receiver Certification

All other receivers subject to part 15

TV interface device

Cable system terminal device

Declaration of Conformity or Certification
Declaration of Conformity
Declaration of Conformity

Cable system terminal device Declaration Stand-alone cable input selector switch Verification

Class B personal computers and peripherals Declaration of Conformity or Certification 1

CPU boards and internal power supplies

used with Class B personal computers

Declaration of Conformity or Certification

Class B personal computers assembled

using authorized CPU boards or power supplies Declaration of Conformity

Class B external switching power supplies Verification
Other Class B digital devices and peripherals
Class A digital devices, peripherals and

external switching power supplies Verification
Radar detectors Certification
All other devices Verification

(b) Only those receivers that operate (tune) within the frequency range of 30-960 MHz, and CB receivers, and radar detectors are subject to the authorizations shown in paragraph (a) of this section. However, receivers indicated as being subject to Declaration of Conformity that are contained within a transceiver, the transmitter portion of which is subject to certification, shall be authorized under the verification procedure. Receivers operating above 960 MHz or below 30 MHz, except for CB receivers and radar detectors, are exempt from complying with the technical provisions of this part but are subject to § 15.5.

§15.109

(h) For radar detectors, the field strength of radiated emissions within the frequency range of 10.7-12.7 GHz shall not exceed 85 microvolts/meter at a distance of 3 meters. The field strength of radiated emissions in other frequency ranges above 30 MHz from such devices shall comply with the limits in paragraph (a) of this section.

Proposed Changes to Part 2 Rules:

§ 2.962 Requirements for Telecommunication Certification Bodies

- (f)(5) A TCB may not:
- (i) Grant a waiver of the rules, or certify equipment for which the Commission's rules or requirements do not exist or for which the application of the rules or requirements is unclear.
 - (ii) Take enforcement actions; or
 - (iii) Authorize a transfer of control of a grantee-; or
 - (iv) Grant certification applications for radar detectors (as defined in § 15.3(ee)).

Effective Date: Immediately upon publication in the Federal Register.
